OBJECTIVE

Final-year Computer Science Technology student looking for a 14-week programming internship, from January 25 to April 30, 2027. I build web applications and games, and I'm looking for a place where my work has a real impact for users.

PROJECTS

Registrar - School management web application | Solo project, Winter 2026
ASP.NET MVC 5, C#, SQL, Azure

- Full CRUD application to manage students, courses and teachers
- Deployed online on Azure

Frénésie - Online PvP game | Team lead, team of 4, Fall 2026 (in progress)
Unity, C#, Netcode for GameObjects, Unity Cloud Save, GitHub, Scrum

- Programmed the playable characters and their abilities, using pair programming
- Cloud save system (Unity Cloud Save, anonymous sign-in) for gems and unlocked upgrades
- Health and damage system; project run in 4 Scrum sprints with reviews

Rental-Fleet - Vehicle rental platform | Solo project, Fall 2026 (in progress)
Node.js, JavaScript (Fetch), PHP (cURL), REST API

- Node.js REST API used by a JavaScript admin panel and a PHP site (cURL), in a local environment

DarQuest - Fantasy web shop | Team lead, team of 4, Winter 2026
PHP, MySQL (PDO, stored procedures), HTML/CSS, JavaScript, LAMP server

- PHP programming of features: login, shopping cart, inventory and riddle system

JankyFantasy - Co-op game for 1 to 4 players | Team project, Spring 2026
Unity, C#, Input System

- Character architecture (base class and three playable classes) and revive system
- Support for multiple keyboards and controllers at the same time

VoidTech - Mobile shopping app | Solo project, Winter 2026
React Native, Expo Router, SQLite

- E-commerce app with navigation, local database and FR/EN translation

TECHNICAL SKILLS

Languages: C#, Java, PHP, JavaScript, SQL, HTML/CSS, GDScript | learning: Python, Dart
Web and mobile: ASP.NET MVC, Node.js, REST API, React Native (Expo)
Games: Unity (Netcode for GameObjects, Input System), Godot (GDScript)
Databases: MySQL, SQLite, relational database design
Tools: Git/GitHub, Visual Studio, Azure, FileZilla, Windows, Linux
Concepts: object-oriented programming, asynchronous and multithreaded programming, Scrum

EDUCATION

DEC in Computer Science Technology (420.B0) | Collège Lionel-Groulx, Sainte-Thérèse | August 2024 - present
Web, mobile and video game development profile: object-oriented programming, databases, web and mobile applications, game development.

LANGUAGES AND STRENGTHS

Languages: French (native), English (fluent)
Strengths: teamwork, problem solving, autonomy, quick to learn new technologies
